

# Verification ISO14001:2004(Environmental) INTERNATIONAL 5 Day Lead Auditor

This five day training programme focuses on the principles and techniques that are required to effectively lead audits of environmental management systems.

## **Introduction**

The ISO14001:2004 standard is seen as a means to improve the overall environmental legislative compliance and existing system arrangements. Internal auditing is one of the fundamental mechanisms for maintaining but also for developing and improving existing working practices within an organisation. This course focuses delegates on the most important attributes of the ISO14001:2004 management system and helps them to understand the role of the auditor in development and improvement of this system.

## **Who Should Attend?**

This course is essential for those who will undertake and lead environmental management system audits, or who will be required to plan, manage and implement an audit programme. It is especially relevant for other management discipline Lead Assessors and 2<sup>nd</sup> Party Assessors/Auditors. The course does not require any past auditing or environmental management experience.

## **Course Objectives**

To enable delegates to effectively plan, perform, evaluate and report the results of environmental management system audits. To help delegates understand the key attributes of a good environmental management system and the role of the auditor in its continual improvement and development.

## **Course Content**

- Global environmental issues
- ISO 14001 & EMAS, ISO 14010, 14011, 14012 and ISO 19011 – (included proposed ISO14001:2015 changes)
- Identification of environmental aspects
- Legislative requirements
- Continual improvement process
- Prevention of pollution
