

This one-day course is designed to provide delegates with a thorough knowledge of the BS OHSAS 18001:2007 health and safety management system standard and its implementation requirements.

## **Introduction**

Health and Safety performance is a key business performance indicator. It is now not enough to simply comply with the plethora of legislation but also to demonstrate effective and proactive management of health and safety for improvement. It is particularly useful for those who are keen to progress beyond legal compliance and improve the way their system operates. Many companies are now turning to BS OHSAS 18001:2007 as their method of choice and as a means of demonstrating the system's credibility to their existing and potential customers and to other interested parties. This course introduces delegates to the BS OHSAS 18001:2007 management system model and describes how this standard can be used to implement a certifiable system.

## **Who Should Attend?**

This course is invaluable for those who are health and safety practitioners currently managing a health and safety policy and seeking to improve its performance. It is also invaluable for those who have a general need to know more about BS OHSAS 18001:2007 and for those who are considering implementing an BS OHSAS 18001:2007 based system.
