

This interactive five-day training programme focuses on the principles and techniques that are required to effectively lead audit health and safety systems.

Introduction

The BS OHSAS 18001:2007 standard is seen as a means to improve the overall health and safety legislative compliance and existing system arrangements. Internal auditing is one of the fundamental mechanisms for maintaining but also for developing and improving existing working practices within an organisation. This course focuses delegates on the most important attributes of the BS OHSAS 18001 management system and helps them to understand the role of the auditor in development and improvement of this system.

Who Should Attend?

This course is essential for those who will undertake internal health and safety management system audits as a lead, or who will be required to plan, manage and implement an internal audit programme. The course does not require any past auditing or health and safety management experience.

Course Objectives

To enable delegates to effectively plan, perform, evaluate and report the results of internal health and management system safety audits and to help delegates understand the key attributes of a good health and safety management system and the role of the lead internal auditor in its continual improvement and development.
