

Verification ISO9001:2008(Quality) INTERNATIONAL 2 Day Internal Auditor

This interactive two-day training programme focuses on the principles and techniques that are required to effectively audit quality management systems.

Introduction

The ISO9001:2008 standard is seen as a means to improve the overall quality of product and service and existing system arrangements. Internal auditing is one of the fundamental mechanisms for maintaining but also for developing and improving existing working practices within an organisation. This course focuses delegates on the most important attributes of the ISO9001:2008 management system and helps them to understand the role of the auditor in development and improvement of this system.

Who Should Attend?

This course is essential for those who will undertake internal quality management system audits, or who will be required to plan, manage and implement an internal audit programme. The course does not require any past auditing or quality management experience.

Course Objectives

To enable delegates to effectively plan, perform, evaluate and report the results of internal quality management system audits. To help delegates understand the key attributes of a good quality management system and the role of the internal auditor in its continual improvement and development.
